

GEA Farm Technologies

DairyPlan C21

Herd and parlor management system

- Comprehensive production and health data.
- Integrated monitoring and control of parlor systems.
- User-friendly displays and accurate reports.

GEA Milking & Cooling | **WestfaliaSurge**

GEA Farm Technologies — The right choice.

Monitor and control parlor systems as you manage your whole herd

Dairy Management System 21

Convert your data into information you can use!

Whatever your management style, DairyPlan C21 will help you obtain the information you need in a clear and easy manner through the latest software technology.

Evaluating, Analyzing, Monitoring, Benchmarking, and Planning: DairyPlan C21 offers the right software tools for successful management of your complete herd — from calves to milking cows to dry cows.

Reproduction and Herd Health Management

- Review and manage reproductive efficiencies.
- Pinpoint problem cows — fertility, mastitis & other health problems.
- Forecast milking cow numbers, dry cows and number of calvings.
- Organize herd health checks, vaccination & synchronization programs.
- Evaluate statistics on ailments and treatments.
- Detect heats on milking animals and youngstock with activity monitoring.
- Record and evaluate Body Condition Scores.

Milk Production Management

- Monitor milk production — daily, monthly and yearly averages.
- Prevent lactation pitfalls and keep production where it should be.
- Identify and treat exception cows immediately.
- Integrate component test results by herd or by individual.
- Manage and view milking routines from the computer.
- Evaluate milk flow & production data.
- Measure milk conductivity and better monitor mastitis.

System Management

- Regulate and monitor connected hardware components.
- Analyze parlor performance and work flow routines.
- Sort animals automatically by setting criteria in software.
- Monitor parlor washing performance.
- Manage concentrate feeding.
- Interface with tank controls to record milk temperatures.
- Automatically weigh animals & record body weights on the move.
- Monitor DairyFeed calf feeders and manage youngstock.

DPMobil II

Software for hand held (Windows® and Palm operating systems) computers allows users to view cow records and enter reproductive and health data anywhere on the farm. Data can be downloaded to the main computer.
